- Fast, Efficient Trim Saw to Reclaim Lumber
- Keeps Operator at a Safe Distance with Unique Design & Blade Guard
- 3 Strand Chain Feed Conveyor with Adjustable Feed Speed Control
- Four Adjustable Board Length Stops for Easy Board Placement

**Frame Provides
Incline**

Model OM-3

Model OM-3

OPTIMAX single end trim saws are the ultimate in fast, safe, and efficient recovery of deck boards and stringers. At up to 3,000 boards per hour an OPTIMAX saw can keep up with the highest of production demands that far exceed conventional saws. Precision infeed chains provide accurate cuts every time. The unique design of these saws also provides optimization of each and every board.
