

NEOCORTEX: Pallet Sorter

The Neocortex Pallet Sorter is a revolutionary solution to a traditional problem. In the past, operators manually sorted pallets or assisted with a multistage handling system. The Neocortex Pallet Sorter is fully automated and capable of greater efficiency than any other solution. The design is elegant and compact, reducing floor space and increasing efficiency. The sorter can be modified to accommodate customer needs.

- A complete turn-key robotic pallet sorter that uses Neocortex to handle variability.
- Designed for all types and brands of pallets, slip sheets, and debris, up to 400 pallets per hour with stacks up to 18 high.
- Neocortex, a true Industry 4.0 product, captures data analytics for additional analysis and inventory control.
- A pallet inspection module is available.
- Priced to save money the day it is turned on.
